- 1in pos page checkout calc not working
- 2paid amount by default should display total + not mandatory input
- 3Hold
- 4Expense Area
- 5make sure to download all files of css and JS and store it with us

- 6Order model pos page remove extras and show more details

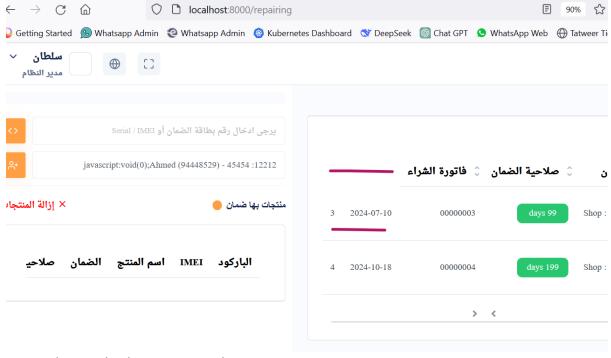

- 7remove extra data in table white getting details and make sure about translate (http://localhost:8000/warranty)

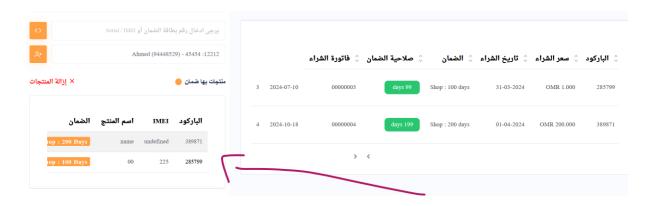

- Make sure about warranty remain days .. (Haseeb Knows)

0000004

- Extra data

- as we discussed only one item can be repair in same time

- Remove a pic to reduce a space

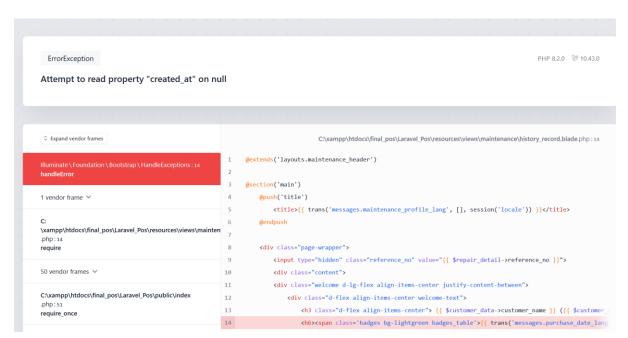

Date issue:

- Sidebar removed while enter to http://localhost:8000/repair data
- Deliver date not appear in (repair_data)
- First order is delivered but info button getting php error+ deliver date not appear

- Offer page only stock item to get
- Apply font arab in quotation
- Quotation not working with me
- In quotation new sidebar not shown
